

Green Motion SA is a Swiss company that for the last ten years has been pioneering the design and production of charging systems for electric vehicles.

It manufactures charging stations, designs management software for charging networks, operates charging stations and is a service provider for electric mobility. Our software solution enables us to manage and monitor charging stations networks in real time.

Green Motion SA operates its own network of charging stations under the “evpass” banner as the most extensive Swiss network and one of the leading European networks. For more information about Green Motion SA go to: www.GreenMotionEV.com

To strengthen our passionate software team in Le-Mont-sur Lausanne, we are looking for a :

SENIOR FULL STACK DEVELOPER

Within a developer team, you will play a key role in the transformation of our software solution to a pure cloud-native application composed of multiple services, in order to deliver extensive features for our world-wide customer and bring our software solution to its next stage of evolution.

Key responsibilities

- Convert user needs to new features of our future SaaS application using iterative agile methodologies
- Deep involvement in the architecture of the applications in AWS
- Maintain quality and ensure responsiveness of applications by including automated testing best practices in the development process
- Support the entire applications lifecycle (concept, design, test, release and support)
- Produce fully functional new features writing clean code
- Apply best software engineering practices (testing, documentation, code review, etc.)
- Share your expertise in cloud-native applications to support your colleagues
- Project monitoring and reporting to your manager

Main technologies used: AWS: CloudFormation, EC2, ECS, EKS, API Gateway + Lambda, SageMaker, RedShift; Microsoft: C#, ASP.NET MVC + Razor, .NET 4.5+, .NET Core, LINQ, SQL Server; Angular JS, Git, JIRA, CI Tools

Smarter Electric Mobility Solutions

About your profile

- MSc or BSc from a leading university or institute of technology
- Minimum 10 years of experience in developing business application, ideally with Microsoft languages
- Solid experience with AWS, in particular serverless applications, data and machine learning. Ideally you have worked on a SaaS solution.
- Comfortable with Domain Driver Design and microservices approach
- Comfortable with agile practices and principles
- Open-minded and very positive can-do attitude
- Interest in electric mobility domain
- Appreciate challenges & technical excellence
- AWS Certification is a strong asset
- English mandatory, Fluent in French is an asset

What we offer

- An opportunity to work in an awesome, fast-scaling company with strong values, in the great sector of electric vehicles
- A unique opportunity to bring your vision of a successful and efficient business application within the company
- A young and dynamic agile team where transparency, respect and teamwork are valued
- Opportunity to work on projects leveraging cloud technologies like machine learning, serverless architectures and BI / data services

Do you recognize yourself in this profile? Are you up for a new challenge?

We look forward to receiving your application at jobs@greenmotion.ch
